

STAINLESS STEEL MICRO INGREDIENT SYSTEM

STANDARD DIMENSIONS

WEIGH BACK FEATURE

Independent load cells for a bin can either record bin inventory or can be used for loss-in-weight applications.

OPTIONAL PLATFORM AND STAIRS ARE AVAILABLE

Robust worm style gearbox with 3/4 HP TEFC or explosion proof motors.

Micro ingredients are weighed in the stainless steel drum, which rotates to discharge into a transfer conveyor.

Micro systems can be built in a variety of configurations. Multiple units can be configured for an infinite number of micro ingredient bins.

VARIABLE PITCHED AUGERS

Flighting is varied to keep bin contents level throughout the entire emptying process.

MICRO BIN SIZES INCLUDE:

- 2.8 cu. ft. 4.6 cu. ft.
- 5.6 cu. ft. 9.2 cu. ft.

HIGH ACCURACY LOAD CELLS

NTEP approved load cells for individual bins are available for inventory purposes.
