Natural Ingredients

OXABIOL® pet

Natural antioxidant made from Tocopherols from Non-GMO vegetable oil. **Oxabiol® pet** is an excellent product to protect lipid compounds, increasing product shelf life and preserving its freshness and active ingredients. **Oxabiol® pet** is a 100% natural product, available in different concentrations and formats (liquid or powder). It is a unique product developed exclusively by **BTSA**.

ANTIOXIDANT ACTIVITY

The high antioxidant power of **Oxabiol® pet** is the result of the synergy between its active ingredients, which are naturally present in the product. **Oxabiol® pet** provides stability to fats, oils and meat or fish flours, as well as other components that incorporate pigments, vitamins or fatty compounds susceptible to oxidation, increasing the shelf-life of products

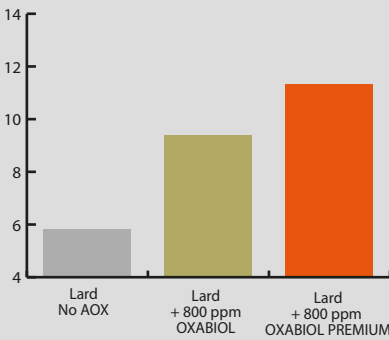

BENEFITS

- 100% natural antioxidant
- Exempt from legislative restrictions
- Effective at low doses
- Does not alter product palatability
