Video Production

All you need is an idea or objective you need to meet. From there, the *Feed & Grain* team can be your full-service video production house. From conception to completion we've got the resources to produce a high-quality product — and at a competitive price.

Multiple video options are available to help you leverage the format that produces higher advertiser engagement levels. *Feed & Grain* can provide professionally produced product demos, trade show

videos and other custom videos tailored to your specific marketing needs. Here are a few samples of video production marketing ideas:

- **Newscasts:** The Custom Newscast is a medium-length (3 to 5 minutes) video production that aims to be an informational resource for the viewer. With segments that could include news, company highlights, product features, interviews and more, the newscast is a custom production where you determine the content. The video can also be tailored around specific events like trade shows or company milestones.
- **Webcasts:** Launch new products; directly interact with your customers; share solutions to critical issues within the industry; drive new leads.
- **Profile Video:** Feature your product, company or key executive, captured on location at your facilities or a trade show. This is blended with supplemental video shot on location, and can also include images and existing video of the product. The end result is an engaging and informative video to drive sales.
- **Video Spotlight:** This is a week-long campaign that features and promotes your video in the following ways to our subscribers and end users: eNewsletter, homepage banner ads, Feedandgrain.com video library, keyword optimized.
