

FORK DEVIL FORKLIFT MOUNTED HOPPER GATE OPENER

The Fork Devil Forklift Mounted Hopper Gate Opener is one of the most economical openers we manufacture, but it's just as powerful as the rest. This unit's hydraulic motor is powered by the hydraulic system of the forklift or other fork equipped device via the auxiliary hydraulic ports. This makes the Fork Devil a great solution where power options such as air and electric are not available.

The 6-5/8" pockets of the Fork Devil fit most standard forks without modification. There are two sets of pockets on the unit which allow the operator to open hopper gates from either a parallel or perpendicular position to the railcar.

BENEFITS:

- Prevents operator injury
- Increases unloading speed
- Single-person operation from seat
- Smooth, continuous torque
- Low maintenance cost

FEATURES:

- Pockets fit most standard forks
- Utilizes forklift's hydraulics – no other power source needed.
- Built in hydraulic flow control
- Mounts from side or back of opener
