

The Benefits of HD Printing

Sharp Details & High Contrast

Smooth Transitions

Intense Colours

At Peel Plastics we take pride in using the most current technology and equipment in our manufacturing processes. We house all of our print, lamination and converting capabilities in our two neighbouring locations, which gives us a clear advantage over the control and final quality of our product.

With HD printing, we can achieve higher image resolution resulting in better highlights, smoother transitions and sharper detail. This technology increases contrast, which results in stronger and brighter colours.

These improvements allow our flexographic printing to rival that of rotogravure. Call us. We've been thinking about packaging since 1978.
